

Using OpenVPN File on iOS

1. Install OpenVPN App

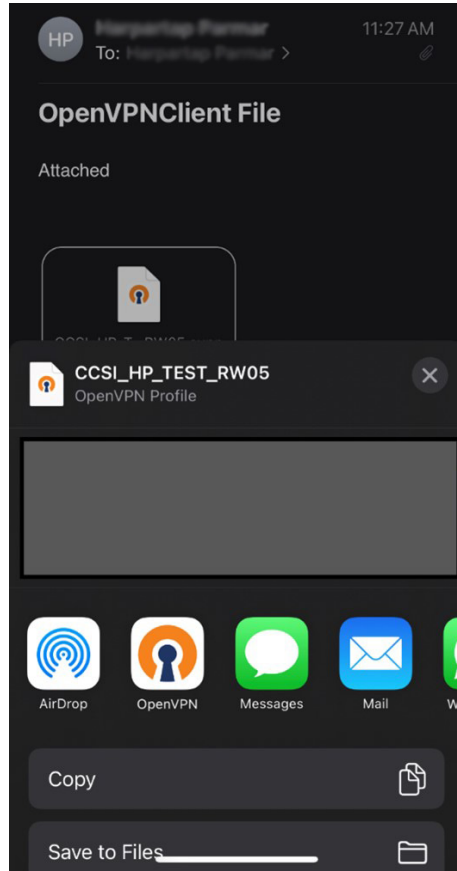

- Go to the App Store and Search for **OpenVPN Connect**.
- Download **OpenVPN Connect** on your iOS device.

2. Email the roadwarrior .ovpn file from your RemoteVPN account.

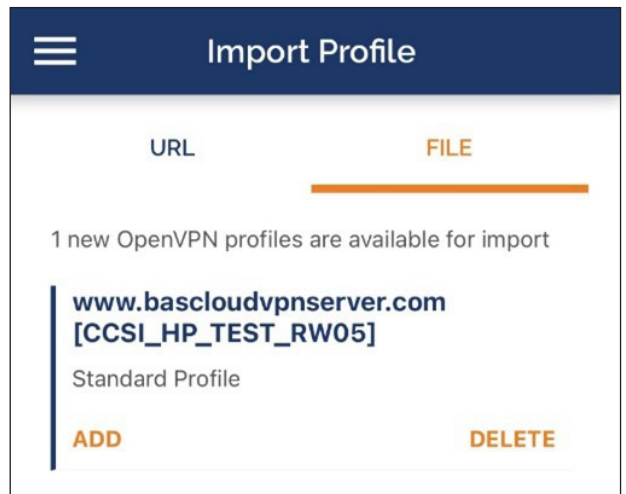

3. Click on the **.ovpn** file and select the OpenVPN icon.

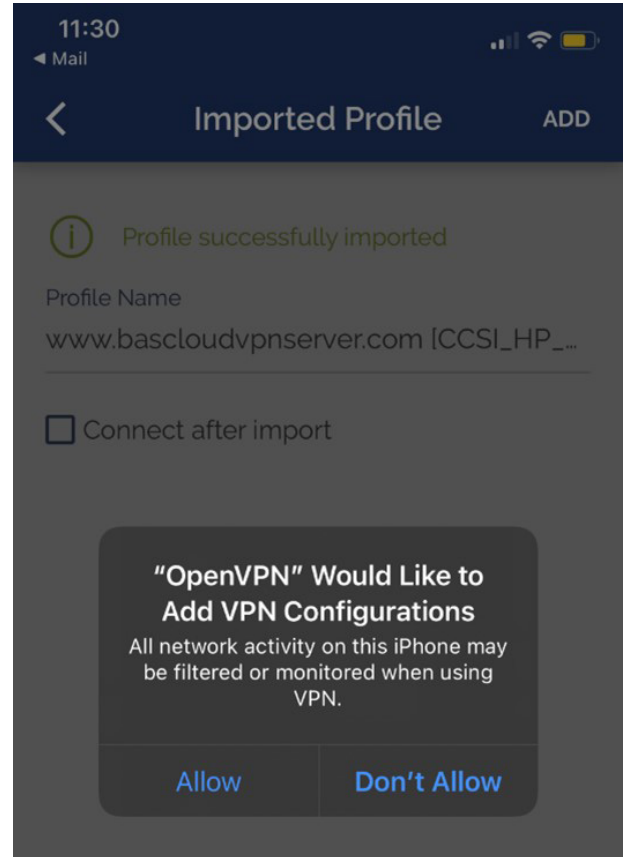

4. The Import Profile option opens up in the OpenVPN app.

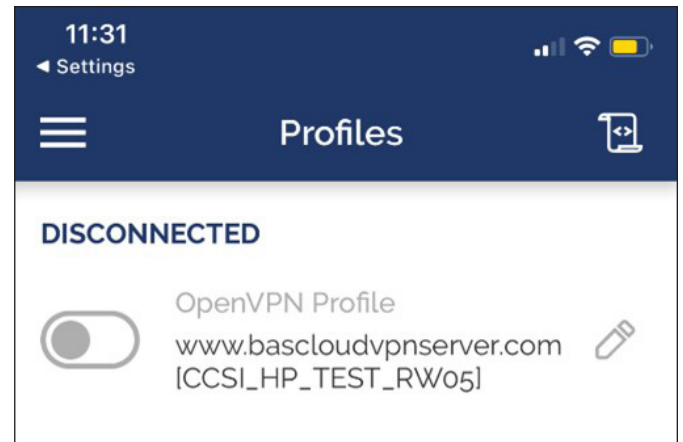

Select the **Add** option under the profile name.

- Click **Allow** if a pop up appears requesting permission to add the VPN configuration.
Enter your password if prompted.

- The **Profiles** now show the newly added OpenVPN profile.

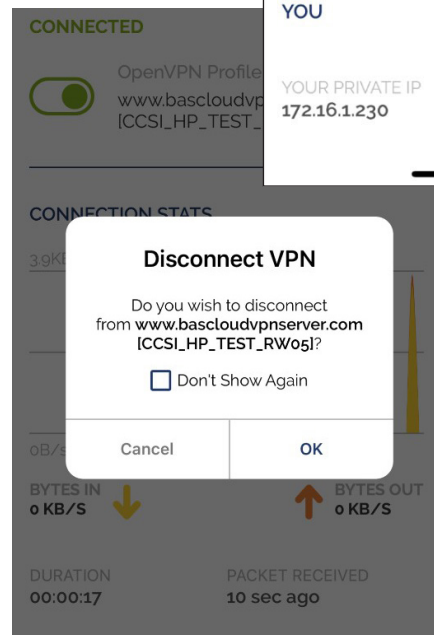

Application Note – Using OpenVPN on iOS

- Click on the slider next to the OpenVPN profile name. The VPN connection will become active, and the slider will turn green. It will also show the connection statistics.

- Click the slider again when you need to disconnect. Click **OK** if a Disconnect VPN pop-up appears.
