NEWS RELEASE

Contemporary Controls Celebrates 40yrs of Business by Offering Free Technical Book

May 2015 — Two-thousand and fifteen (2015) marks Contemporary Controls' 40th year of designing and manufacturing network automation products. This is a true American success story considering that Contemporary Controls, an international company, began in the basement of the Founder and President of the Company, George Thomas.

To help celebrate the 40th Anniversary, Contemporary Controls has published ***Network Communications for Buildings*** from a collection of articles from their Extension and Essentials technical newsletters. All articles are updated and relevant with the latest information on network technology, applications and theory of network communications. Visit www.ccontrols.com/ncb to download your **FREE** copy.

"I have always had a strong interest to help educate the industry. As we reflect on 40 years, we cannot help but admire the technological changes that have influenced both the automation systems we produce as well as how companies are now doing business. We have witnessed the migration from standalone controllers to fieldbus-networked controllers to IP-based network controllers. The open-systems movement has helped companies participate in markets once dominated by larger companies with their proprietary systems. The building automation market is a great example with technologies such as BACnet, Modbus and Ethernet for all to use," states George Thomas.

For network automation products, Contemporary Controls received "***Product of the Year***" at the recent CTA awards ceremony (peripheral category) which includes products from the BASautomation portfolio of inexpensive automation devices including BACnet/IP Sedona Controllers, BACnet Routers and Gateways, and web-based graphical head-ends. The CTRLink Ethernet product line includes unmanaged, managed, and PoE switches, wired and wireless routers, splitters, media converters, and more. In addition to Product of the Year, George Thomas was inducted into the CTA "Hall of Fame" at the CTA awards ceremony.

Contemporary Controls continues to grow from the result of treating people right —by providing quality, low-cost network devices that fulfill customer requirements — exactly what they set out to do 40 years ago. www.ccontrols.com

About Contemporary Controls

Contemporary Controls is your ideal partner for applying network technology to your building automation project. The year, 2015, marks our 40th anniversary of designing and manufacturing network automation products. With our networking experience, locations around the world, and a reputation for technical support, Contemporary Controls has the expertise required to make your building automation projects successful. For more information, visit www.ccontrols.com, call 630-963-7070 or email info@ccontrols.com.
